Breakthrough on the Spanish public market

Sectra to install PACS at five public hospitals in northwest Spain

The Swedish IT and medical-technology company Sectra has signed an agreement with SERGAS, the healthcare service provider of the Galicia region in the northwest of Spain, to install PACS at five of the region's public hospitals. The order comprises Sectra PACS products and services and Sectra's productivity suit for radiology departments.

Sectra PACS (system for handling radiology images) will serve in a totally integrated radiology solution incorporated into the hospitals' existing IT infrastructure. Digitizing imaging operations will increase workflow efficiencies and provide radiologists with instant access to images and information regardless of location. The hospitals will be able to exchange data and share workload in a completely secure way without compromising patient integrity.

"We were looking for a solution to view images and information across hospital boundaries which enables us to utilize our resources in the most efficient manner," says Benigno Rosón Calvo, IT Manager at SERGAS. "Sectra has proven very flexible and attentive to our needs and the effectiveness of radiological performance will increase significantly since all relevant imaging and findings data is available whenever and wherever they are needed."

"The agreement with SERGAS is a strategic step into the public healthcare market in Spain. It confirms our ability to provide first-class products and service and support," says Carlos Cardoso, President of Sectra Iberia.

About Sectra's medical operations

Sectra develops and sells IT-systems and products for radiology, mammography and orthopedic departments. More than 950 hospitals worldwide use the system daily, together performing over 45 million radiology examinations annually. This makes Sectra one of the world leading companies within systems for handling digital radiology images. In Scandinavia, Sectra is the market leader with more than 50% of all film-free installations. Sectra's systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East.

About the Sectra Group

Sectra successfully develops and sells cutting-edge products in the expansive niche segments of medical systems and secure communication systems. The company was founded in 1978 and has its roots in the Linköping University in Sweden. Today, Sectra has offices in eleven countries and operates through partners worldwide. Sales in the 2007/2008 fiscal year totaled SEK 743 million. The Sectra share is quoted on the Nordic Exchange in Stockholm. For more information about Sectra visit <http://www.sectra.com>.
